

# LoopMat

Perfect for the reception area

## Features

- Dimensions 600x600x4mm
- 1 metre of cable 2x1mm<sup>2</sup> (varnished copper) with tinned extremities
- Material: copolymer synthetic acrylo nitrile (ACN) and butadiene NRB rubber with high fire resistance
  - High and constant friction
  - High resistance against abrasion, even in higher temperatures
  - Very good dynamic properties
  - Resisting oil and acids
  - The NRB rubber contains excellent antistatic properties
- Fixation on the ground by 3M adhesive applied to the rear side of the LoopMat
- For indoor installation (limited use outside)
- Works with the following Univox products: PLS-X-series and CLS-5
- Weight: 3kg

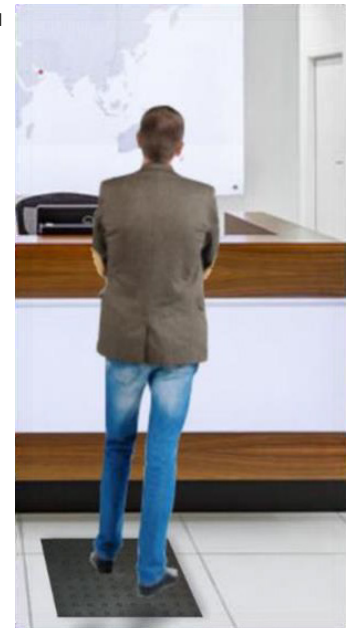

## “Plug and Play” LoopMat

The LoopMat is the perfect solution when you want to increase accessibility for the hearing impaired at reception or information desks. The mat has a built-in magnetic loop so that hearing aid users with activated T-mode can hear what’s said without being disturbed by surrounding noise.

LoopMat is also designed for tactile recognition by blind and visually impaired people.

The LoopMat is connected to a loop amplifier, e.g. Univox CLS-5, to achieve the magnetic field that is necessary to help the hearing aid wearer.

The mat is easily attached to the floor with double sided tape (included).

Art no	Description
283260	LoopMat, 600 x 600 x 4mm, Black
